

In the digital age today, electronic devices are of great importance to humans. Some popular electrolic devices such as: TV, smart phone, laptop, electronic watch, printer, projector... Among them, my favortite is the laptop because it has accpompanied and helped me during the covid-19 epidemic a lot. It's black and rectangular, its length is about 60 centimeters, its weight is about 1.6 kilograms so I can easily carry it. My laptop is made of stainless steel. Thanks to it, I can access the internet to search for information, take online courses, watch movies, listen to music. I love it so much.
